DETAILED ACTION

Allowable Subject Matter

Claims 1-21 are allowed.

1. Referring to claim 1, the following is a discussion of the most pertinent prior art.

Koshiishi et al. discloses an apparatus for holding a wafer to be processed in a plasma processing apparatus that includes a main body, first dielectric layer film, and a second dielectric film. The holder main body has a holding portion which holds a wafer to be processed placed on it and a flange formed on the peripheral portion of the holding portion to fit with a focus ring. Koshiishi et al. failed to suggest limitations that, the guide ring electrode is interposed between the first ring dielectric material layer and the second guide ring dielectric material layer, the first guide ring dielectric material layer is interposed between the guide ring electrode and the guide ring, and the second guide ring dielectric material layer is interposed between the guide ring electrode and the main body in combination with the other limitations set forth in each of the claims.
